In the rolling hills of a small Kentucky town, a mystery emerged in the summer of 19, as they follow the violent trail of a mysterious villain named Adam who seems to be systematically draining the U.S.'s largest cities of their power. The Ables must continue to hone their special powers to overcome the powers of evil and darkness.

A fundamental natural resource, water and its use not only reflect "modes of production" but also that complex interplay between resources and their exploitation (and domination) by various social agents, who in their turn are inevitably influenced by the abundance or rarity of water supplies. Focusing on scientific, social and economic issues from the 16th to the 19th century, the author, one of Italy's leading historians in this field, looks at the innumerable conflicts that arose over water resources and the environmental impact of projects intended to control them. Venice and Holland are undoubtedly the two most fascinating cases of societies "built on water," with the conquest of vast expanses of marshland - either inland or on the coast (the Dutch polders or the Venetian lagoon) - not only stimulating agricultural production, but also nurturing a deeply-felt relationship between the local populations and the element of water itself. The author rounds off his study by looking at the influence the hydraulic technology developed in Holland would have on many European countries (France, England and Germany in particular) and at questions raised about the environmental impact of agricultural progress and its effects upon the social-economic equilibria within the communities concerned.

P.G. Wodehouse wrote that: 'the three essentials for an autobiography is that your compiler shall have had an eccentric father, a miserable misunderstood childhood and a hell of a time at his public school and it is my contention that I have the advantages'. Jeremy Scott had them all and then went on to: * Have an Evelyn Waugh like youth * Poison a battalion of the British Army (deliberately) * Work as a gigolo (well, he tried, amongst the glitterati of New York) * Get Edward Heath stoned on amphetamines * Tangle with Lord Lucan; and work with David Bailey and Terry Donovan; and have Paul Newman's daughter fall in love with him * Live with Peter Mayle, his best friend in Provence This is a wildly funny, hugely entertaining and, in part tragic, memoir of an accidental life spent in the fast lane (an E type Jaguar in fact) with everyone who was anyone in the 1960s and 1970s.

Why do women go for bastards? Not all women certainly, but an identifiable number of them - including almost all heiresses - find themselves drawn to, even marrying, a thoroughlygoing wrong'un who steals their money, cheats on them and sometimes beats them up. Why, to these educated, rational, rich and otherwise balanced young women, is Mr Wrong Irresistible? What is it about him, what is it in them? In short, what is the nexus between wealth, celebrity, sex and self-destruction? The Irresistible Mr Wrong is the serial biography of five women who were all nearly married to the same man: Porfirio Rubirosa. From the Jazz Age to the mid-sixties, through Cafe Society, Hitler's Berlin, occupied Paris and the post-war fleshpots of the Jet Set, Jeremy Scott charts the glamour and tragedy of the wives and mistresses of the ultimate playboy.

Victoria Woodhull, Mary Molesworth, Aimee Semple McPherson, Edwina Mountbatten, Margaret Argyll and Chanel were all women who dared. They had no time for what society said they could and couldn’t do and would see the world bend before they did. In 1872 a mesmerising psychic named Victoria Woodhull shattered tradition by running for the White House. Had she won the ensuing spectacle would surely have rivalled that of our own era. Abhorring such flamboyance, Mary Molesworth inspired a revolution of thought with her pen as she issued women's first manifesto – still to be fulfilled. From Aimee McPherson, the first female preacher in America, to Coco Chanel, designer of an empire, these women became the change they wanted to see in society. In Women Who Dared, Jeremy Scott pays tribute to them all with wit, verve and reverence.

As a toddler, Jeremy Scott suffered from a huge hole in his aorta valve that cruelly denied him the opportunity to live the life of a normal healthy child. At just four years of age Jeremy underwent Open Heart Surgery at the hands of renowned surgeon Sir Brian Barratt-Boyes. Thirty four years later with practically no experience or training, Jeremy took the unbelievably courageous plunge and began a 2 ″ year, $1.96Km bicycle ride that would see him cycle through 29 countries from London to New Zealand. While separate encounters with the Iranian and Filippino Mafia had Jeremy fearing for his life, it was the beautiful acts of kindness offered by strangers throughout the world that will forever warm his heart. While this beautiful story of self-discovery will leave you feeling genuinely inspired, Jeremys stunning photographs from the road will render you speechless in this stunning publication. “Fascinating. Lays a foundation for understanding human history.”—Bill Gates In this “artful, informative, and delightful” (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion —as well as potent weapons of war and agricultural tools—and went to sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

The outline includes: continuity and discontinuities in the Leninist and Stalinist phases, Bolshevikisation versus national traditions, and the role of leading individuals in the Comintern apparatus. A selection of documents will elucidate these central themes.

Quantitative thinking is our inclination to view natural and everyday phenomena through a lens of measurable events, with forecasts, odds, predictions, and likelihood playing a dominant part. The Error of Truth recounts the astonishing and unexpected tale of how quantitative thinking came to be, and its rise to primacy in the nineteenth and early twentieth centuries. Additionally, it considers how seeing the world through a quantitative lens has shaped our perception of the world we live in, and explores the lives of the individuals behind its early establishment. This worldview was unlike anything humankind had before, and it came about because of a momentous human achievement: we had learned how to measure uncertainty. Probability as a science was conceptualised. As a result of probability theory, we now had correlations, reliable predictions, regressions, the bell-shaped curve for studying social phenomena, and the psychometrics of educational testing. Significantly, these developments happened during a relatively short period in world history—roughly, the 300-year period from 1650 to 1950—from about the close of the Napoleonic era, through the Enlightenment and the Industrial Revolutions, to the end of World War I. At which time, transportation had advanced rapidly, due to the invention of the steam engine, and literacy rates had increased exponentially. This brief period in time was ready for fresh intellectual activity, and it gave a kind of impetus for the probability inventions. Quantification is now everywhere in our daily lives, such as in the ubiquitous microchip in smartphones, cars, and appliances, an Logic of Artificial Intelligence, as well as applications in business, engineering, medicine, economics, and elsewhere. Probability is the foundation of quantitative thinking. The Error of Truth tells its story—when, why, and how it happened.

Since the election of Scott Walker, Wisconsin has been seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall but brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from strong government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With The Politics of Resentment, Katherine M. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the "liberal elite." Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What you can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and our candidate's social identity matches our own. Using Scott Walker and Wisconsin's prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. The Politics of Resentment shows how rural resentment—no matter how partisanship, race, or class—plays a major role in dividing America against itself.

Scott Turow, #1 New York Times bestselling author and "one of the major writers in America" (NPR), returns with a page-turning legal thriller about an American prosecutor's investigation of a refugee camp's mystifying disappearance. At the age of fifty, former prosecutor Bill Ten Boom has walked out on everything he thought was important to him: his law career, his wife, Kindly County, even his country. Still, when he is tapped by the International Criminal Court—an organization charged with prosecuting crimes against humanity—he feels drawn to what will become the most elusive case of his career. Over ten years ago, in a tiny South Pacific nation following the Bosnian war, an entire Roma refugee camp vanished. Now for the first time, a witness has stepped forward: Ferko Rincic claims that armed men marched the camp's Gypsy residents to a cave in the middle of the night—then with a hand grenade set off an avalanche, burying 400 people alive. Only Ferko survived. Boom's task is to examine Ferko's claims and determine who might have massacred the Roma. His investigation takes him from the International Criminal Court's base in Holland to the cities and villages of Bosnia and secret meetings in Washington, DC, as he tracks a web of suspects and tracks of financial and technological evidence connected to the case: Layton Merrwell, a disgraced US major general desperate to salvage his reputation; Sergeant Major Atilla Doby, a vital cog in American military operations near the camp at the time of the massacre; the Latina Cajun Lorn Kajevic, the brutal former lawyer Ferko's disavowed lover; and of course, Ferko himself, on whose testimony the entire case rests—and who may know more than he's telling. A master of the legal thriller, Scott Turow has returned with his most irresistibly confounding and satisfying novel yet.

The conflict between the United States and the Soviet Union during the Cold War has long been understood in a global context, but Jeremy Friedman's Shadow Cold War delves deeper into the era to examine the competition between the Soviet Union and the People's Republic of China for the leadership of the world revolution. When a world of newly independent states emerged from decolonization desperately poor and politically disorganized, Moscow and Beijing turned their focus to attracting these new entities, setting the stage for Sino-Soviet competition. Based on archival research from ten countries, including new materials from Russia and China, many no longer accessible to researchers, this book examines how China sought to mobilize Asia, Africa, and Latin America to seize the revolutionary mantle from the Soviet Union. The Soviet Union adapted to win it back, transforming the nature of socialist revolution in the process. This groundbreaking book is the first to explore the significance of this second Cold War that China and the Soviet Union fought in the shadow of the capitalist-communist clash.
